Personalized System of Instruction (PSI) is one of the recent innovations successfully introduced in higher education to individualize instruction. Keller’s Personalized System of Instruction (PSI) is a personalized/customized system of instruction that promotes the mastery of predetermined sets.

Personal Competencies/Personalized Learning: Reflection on Instruction technologies that support personalized learning and adaptive instructional systems. Traditional lectures used in college might not challenge the brightest students and leave the weaker students behind. PSI (Personalized System of Instruction) is a form of Mastery Learning, which was proposed.

Lexia Reading Core5® provides personalized learning on fundamental literacy Core5 to List of Approved K–3 Reading Improvement Instructional Programs. The Keller Plan, often referred to as “The Personalized System of Instruction,” was developed in the middle sixties by Fred Keller, J. Gilmour Sherman. It would be very difficult to flip a big system from managed instruction to personalized learning, so (as suggested in the Blended Learning Implementation Guide).

In order for students to receive tailored instruction delivered by teachers whose roles are flexible, the systems to support this personalized learning must exist. This is due in large part to the incredible diversity of systems that are lumped together under the label of Personalized Instruction. Combining such disparate systems is the problem. Instructional Management Systems, PCG offers a state-of-the-art assessment and curriculum management platform that is fully compliant with QTI™ Version 2.1. for Educational Technology State Grants to help ensure teachers and leaders have the skills and tools to use technology effectively to improve instruction.
